

Laser for hair removal HR-2000-3P

Portable triple-wave laser

Gold standard for hair removal, suitable for all hair types and skin colors, including tanned

Handle power **2,000 W**

+421 353 211 408 | fitaims.com | info@fitaims.com

Hair removal laser treats unwanted hair by selectively heating and destroying the melanin in the hair follicles, and thus interrupting the hair growth. By targeting the specific areas in the skin the laser does not damage the surrounding tissue.

Three-wave technology covers all hair and skin types as:

- 755 nm wavelength is specific for lighter skin types and light-colored thin hair
- darker and thicker hair is better treated with 808 nm and is a good solution for moderate skin types
- 1064 nm is a safer option for dark or tanned skin which is prone to high energy absorption and thus burns

2

You may opt for one of two standard handles

large spot size for large treatment areas like bikinis, thighs, calves, upper limbs, underarms

optional small spot size for face, chin, lips, hairline, forehead

Touch-screen control

- Frequency adjustment
- Pulse width adjustment
- Energy adjustment
- Real-time temperature monitoring

3

Highlights

high customization
suitable for almost all skin-hair profiles

large screen size
12.1" and mini 1.54" handle screen make operator's work convenient and fast

long service life
guaranteed 100,000,000 shots - long-lasting and seamless machine operation

efficiency
high output power ensures fast and stable result

EASY
easy operation
intelligent software with preset parameters for all skin types

-t°
TEC cooling system
comfortable treatment & 12-hour downtime-free machine operation

4

Temperature sensor position
Temperature sensor is installed in the handle. The surface temperature is monitored in real time and displayed on the screen.

Sapphire crystal
The sapphire glass provides effective treatment area cooling (up to -30°C) to make the hair removal process safer.

Super refrigeration system
Two semiconductor cooling plates, 108 W super cooling power, the surface temperature of the spot can reach -30°C.

Accessories

5

Warranty

2 year warranty for spare parts.
During the first year of warranty, spare parts and delivery are free of charge. During the second year, only spares are free of charge, the delivery should be covered by the customer.

Downtime

12 hours of continuous work guaranteed

Servicing / Maintenance

Generally the machine is maintenance-free.
Keep the handles clean to ensure hygiene.

6

Specifications

Wavelength	Pulse width	Dimensions	Package size	Net weight
755 nm, 808 nm, 1064 nm	1-200 msec	60 x 43 x 46 cm	74 x 58 x 70 cm	39 kg
Energy density	Handle power			
1-120 J/cm ² (deviation±±2%)	2,000 W			
Spot size	Frequency
