SHR stands for Super Hair Removal, the latest invention in IPL technology. Traditional IPL involves the delivery of individual high-energy shots to the treatment zone. Though much like IPL, SHR uses a more efficient delivery mode. It scans and gradually heats the treatment area with repetitive low-fluence pulses until the hair follicle is destroyed.

What is so good about SHR?

- More comfortable and basically pain-free treatment
- Less thermal damage to the surrounding tissues than standard IPL or laser
- Suitable for tanned skin and darker skin types
- Especially recommended for sensitive skin due to gentle action
- Works well for lighter and finer hairs
- Less post-treatment sun-exposure limitations

What's more, with SHR treatment time can be halved as compared to traditional IPL. That means beauty therapists may double the daily number of hair removal appointments while boosting profits and efficiency.

LumiSense machines can operate in the normal IPL mode, opening the way to skin rejuvenation, pigment removal, acne treatment, and vascular therapy.

E-light treatment mode combining IPL+RF technology is aimed at skin tightening and lifting. It is a noninvasive technique that increases the temperature of the deep layers of the skin, changing the structure of collagen and allowing skin cells to regenerate.

Highlights

- High pulse energies**
stable energy delivery ensuring best treatment results
- Intelligent user interface**
preset treatment parameters for easy operation
- Strong cooling system**
comfortable treatment and zero downtime operation

- Long useful life**
guaranteed 500,000-shot lifespan
- 12,1" screen**
comfortable operating experience
- 3 working modes**
(SHR, IPL, E-light): versatile treatments and flexible settings for better results

Applications

Permanent hair removal: comfortable, non-irritating hair reduction on any body part, suitable for all skin types and all hair colors, even blond hair usually poorly targeted by lasers

Skin rejuvenation: stimulates collagen generation, improves skin texture, reduces pore size and fine wrinkles

Pigmented lesions removal: safely and effectively reduces the appearance of freckles, pigmentation and age spots

Acne treatment: helps clear up even the most extreme cases of facial acne and/or acne scarring

Vascular therapy: helps reduce little veins, acts on the superficial capillaries, causing them to collapse so they are no longer visible through the skin

Accessories

Skin rejuvenation handpiece
8*40mm

600 EUR

Hair removal handpiece
15*50 mm

600 EUR

Operator's goggles

110 EUR

Customer's eye protector

20 EUR

Warranty

2-year warranty

During the first year of warranty, spare parts and delivery are free of charge. During the second year, only spares are free of charge, the delivery should be covered by the customer.

Downtime

12 hours of continuous work guaranteed

Servicing/Maintenance

The machine is maintenance-free.

Keep the handles clean to ensure hygiene.

There may be a need to refill water in a water cooling tank approximately once per 6 months, the corresponding warning will appear on the machine screen.

Consumables

No consumables

Specifications

Wavelength
560-950 nm: skin rejuvenation
640-950 nm: hair removal

RF Power
160 W

Screen Size
12.1"

Spot Size
8x40 mm: skin rejuvenation
15x50 mm: hair removal

RF Energy
1 - 50 J

Net Weight
50 kg

Power Requirements
220 V±10% 50HZ
110 V±10% 60HZ

IPL Energy
10-60 J/cm2

Dimensions
60*50*140 cm

Power Consumption
2000 W

SHR Energy
3-15 J/cm2

Package Size
64*65*123 cm

Working Modes
SHR, IPL, E-light

SHR Frequency
1-10Hz

SHR Pulse Width
1-10 ms
