

Laser  
for tatoo removal  
TR-1064-532-QS-C

STAND-ALONE  
Q-SWITCHED  
ND:YAG LASER

Powerful machine for  
tatoo treatment with an  
excellent cosmetic  
outcome

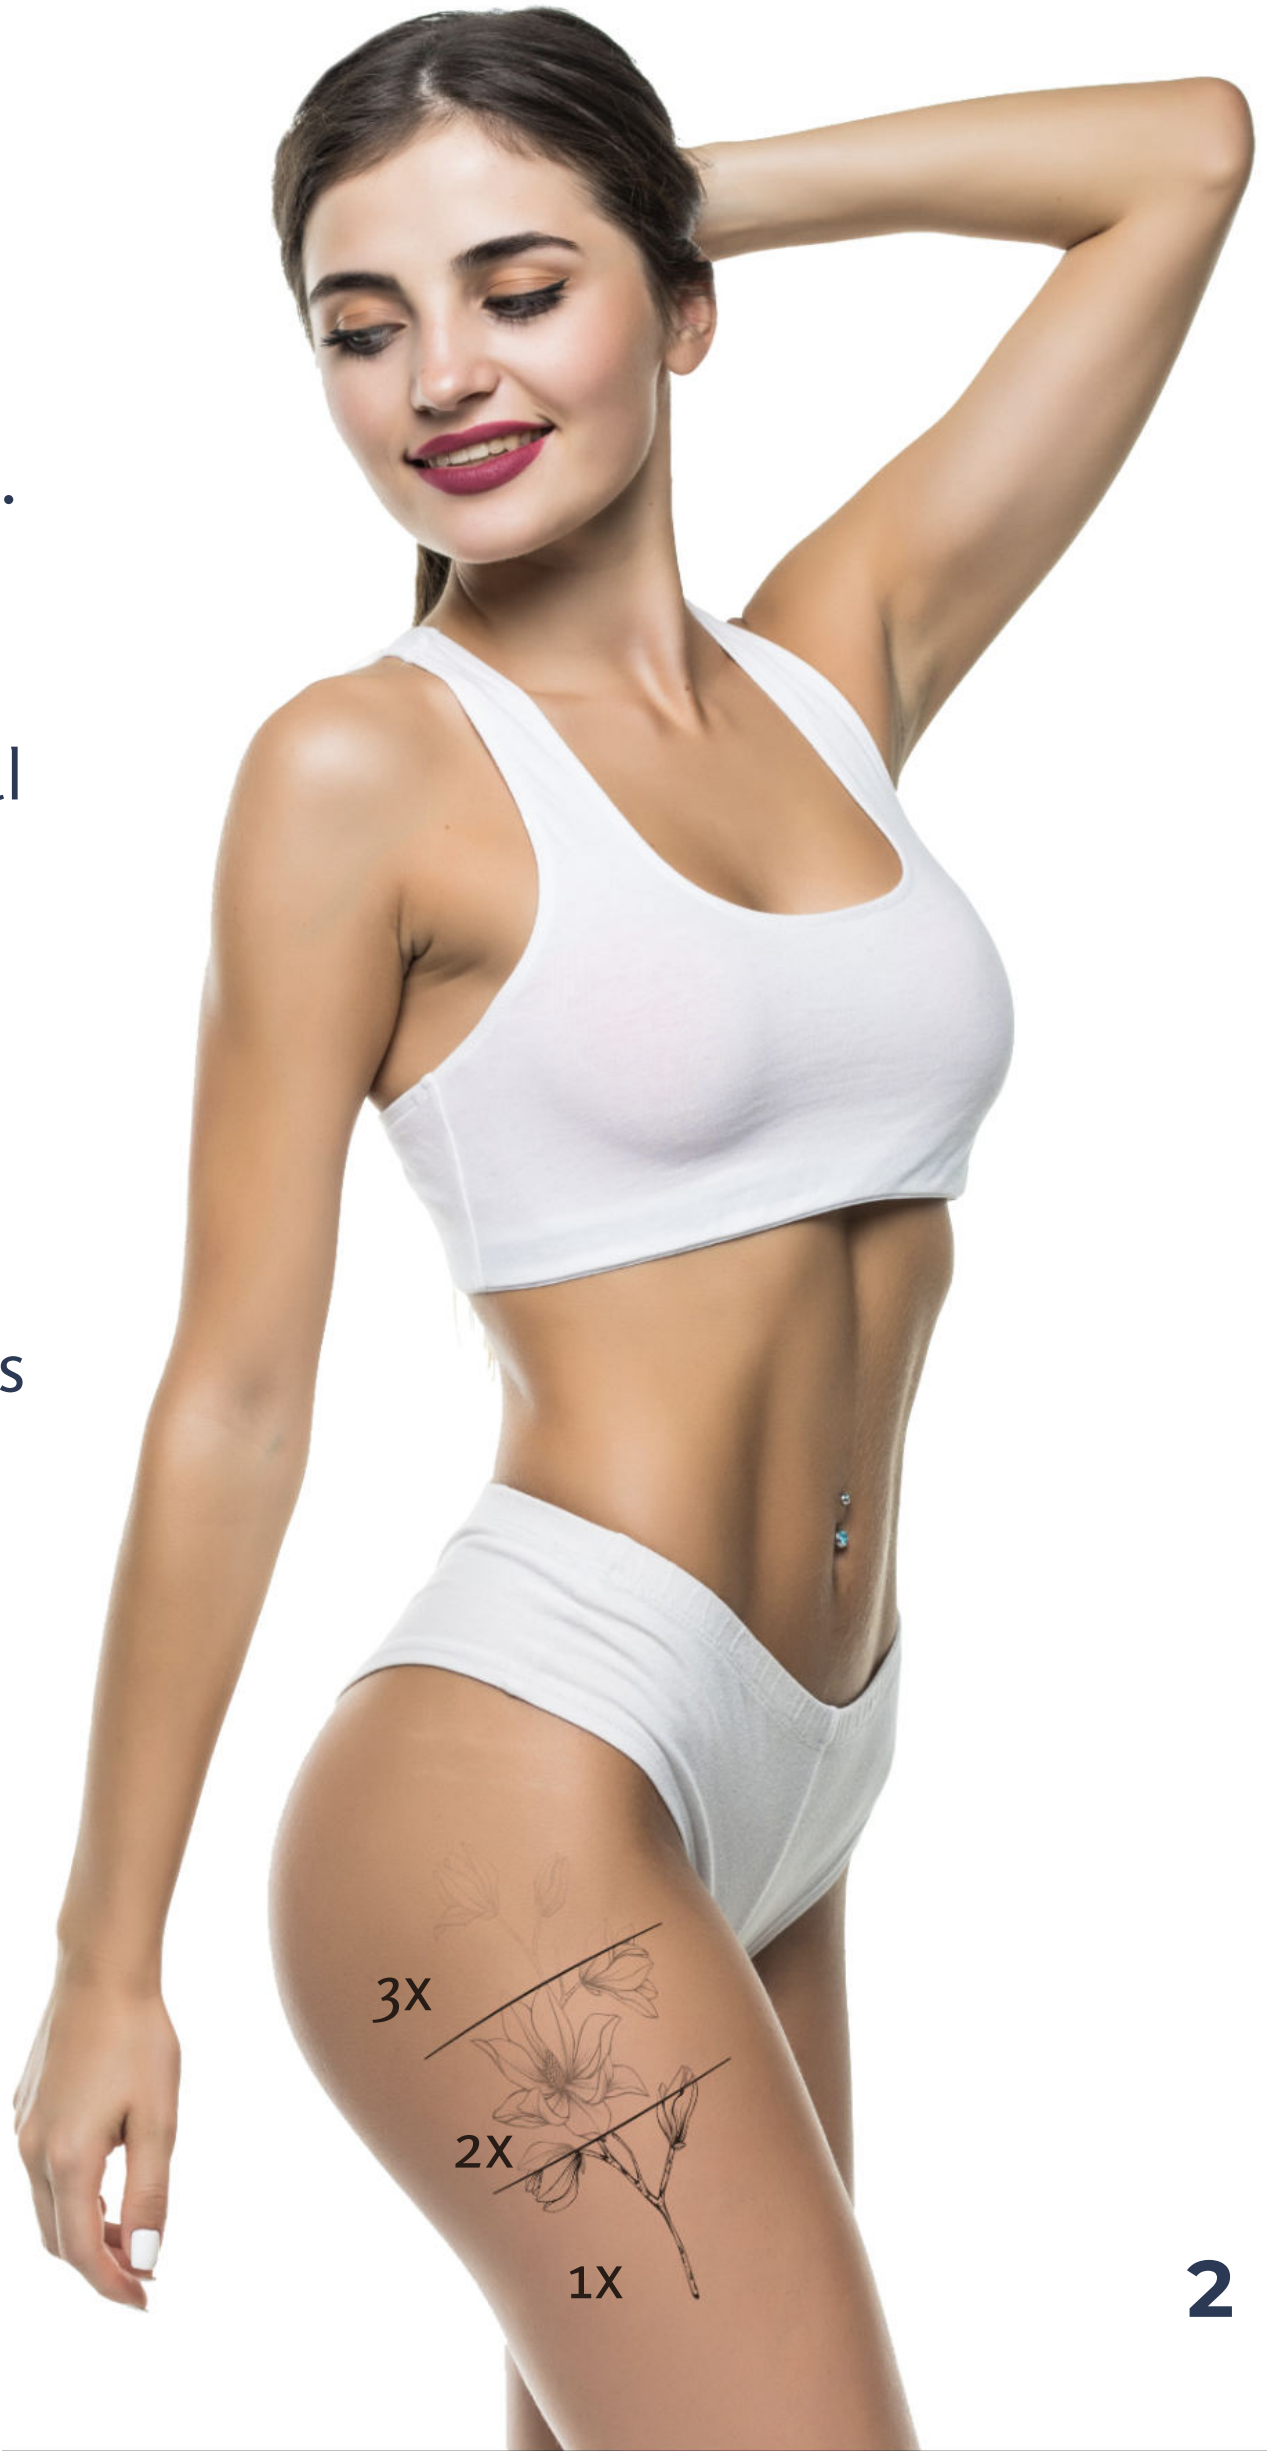

+421 353 211 408    fitaims.com    info@fitaims.com

Quick and easy non-invasive laser skin treatment. Standard handle, 1064 nm and 532 nm, allows removing dark, red, yellow, coffee tattoos as well as dermal and epidermal pigmented lesions.

- Nd:Yag laser is gold standard for tattoo removal as it features:
- **Ultra-short pulse** for precise targeting of pigment with minimal damage to the skin and less painful treatment
  - **Adjustable spot size** (up to 10 mm) for faster treatments and better results

- Neodymium lasers ensure
- **Shorter post-treatment downtime**, as the recovery period takes 3 to 7 days
  - **Lower number of sessions** due to excellent pigment reach and destruction

Add more possibilities with optional handles for red (585 nm) and green (650 nm) tattoo removal, oil control, skin rejuvenation, and skin pore improvement (fractional handle).

2

Highlights

**High pulse energies**  
better pigment  
destruction, fast and  
efficient treatment

**Preset and manual  
working modes**  
higher safety and flexible  
settings for better results

**10.4" screen**  
comfortable operating  
experience

**Long useful life**  
over 5 years of profitable  
service

**Automatic self-checking  
and alarm system**  
reliable and trouble-free  
operation

**4 wavelengths available**  
2 standard and 2 optional  
wavelengths cover the
